Write each round's score on the left and the new total on the right. Hit 200? Circle it and finish the round.

How to score a round

- ① Add up your number cards (0 to 12). The 0 scores nothing but counts toward 7.
- ② Flip a repeat number and you bust: 0 points this round.
- ③ $\times 2$ doubles your number cards only. Then add any $+2$ to $+10$ modifier cards.
- ④ Flip 7 different numbers: $+15$ bonus (never doubled), and the round ends.
- ⑤ Second Chance: toss it with the repeat card and stay in. Hold one at a time.
- ⑥ Freeze banks your points. Flip Three: take the next 3 cards, one at a time.

Example: 3, 7 and 12 with $\times 2$ and $+4 = (3 + 7 + 12) \times 2 + 4 = 48$.

Game end: when a round ends with anyone at 200 or more, the highest total wins. Tied? Play another round.

1 Skip the math. Doodle Score adds it up.
